ADS-PIPE GOES LIVE WITH ASSETCROSSTM SOFTWARE

Advanced Drainage Systems (ADS-Pipe) was searching for a solution to end the tedious transfer process between depreciation books and saves time and money. ADS-Pipe found Chi-Star Technology's AssetCrossTM product.

AssetCrossTM is a fantastic software product from Chi-Star TechnologySM that will help companies eliminate wasted time and money spent on manually transferring assets between books. Cut through the confusion of lost asset trails and endless hours of data entry! The AssetCrossTM program is designed specifically to complement the Oracle® E-Business Suite. Your reliable programs stay the same, except now you are able to streamline data entry.

How much time and money is spent on manually retiring assets, only to recreate them in new books? How much frustration is caused by lost audit trails from retired assets? How many mistakes might be made by manually calculating assets in a new book's currency? Time is money, and both add up! Save valuable resources by adding AssetCrossTM into your current Oracle E-Business Suite implementation.

ADS-Pipe found away to eliminate the risks in such a tedious and manual process and implemented AssetCross. Within a month ADS-Pipe was live with their new software purchase. AssetCross took less than 3 hours to install and we were up and running. "This is a great addition to our Oracle Assets Application" stated Matthew Dilonno, Senior Accountant at ADS-Pipe.
